
Product Specifications

CJ215

<https://proimaging.fr/product/cj215/>

Product Information

Product Name: CJ215

Product Reference: CJ215

Unit Size: 1mg

Shipping Conditions: Room temperature for up to 3 weeks

Storage Conditions: Store 18 months at -20°C and protect from light

Molecular Weight: ~ 1330

Max Absorption: 800 nm

Max Emission : 825 nm

Solubility: Isotonic Dextrose Solution

Product Description

CJ215 is a highly effective tumor labeling dye validated across multiple tumor models, including breast, pancreatic, prostate, colon, and fibrosarcoma.

It delivers exceptional performance in Near-Infrared (NIR) and Short-Wavelength Infrared (SWIR) imaging applications.

Designed to specifically bind to tumor tissues, **CJ215** enables precise visualization and delineation of cancerous tumors through fluorescence imaging, making it an essential tool for advanced cancer research.

Product for Research Use Only. Not for Human Use
